

# #AgriTech

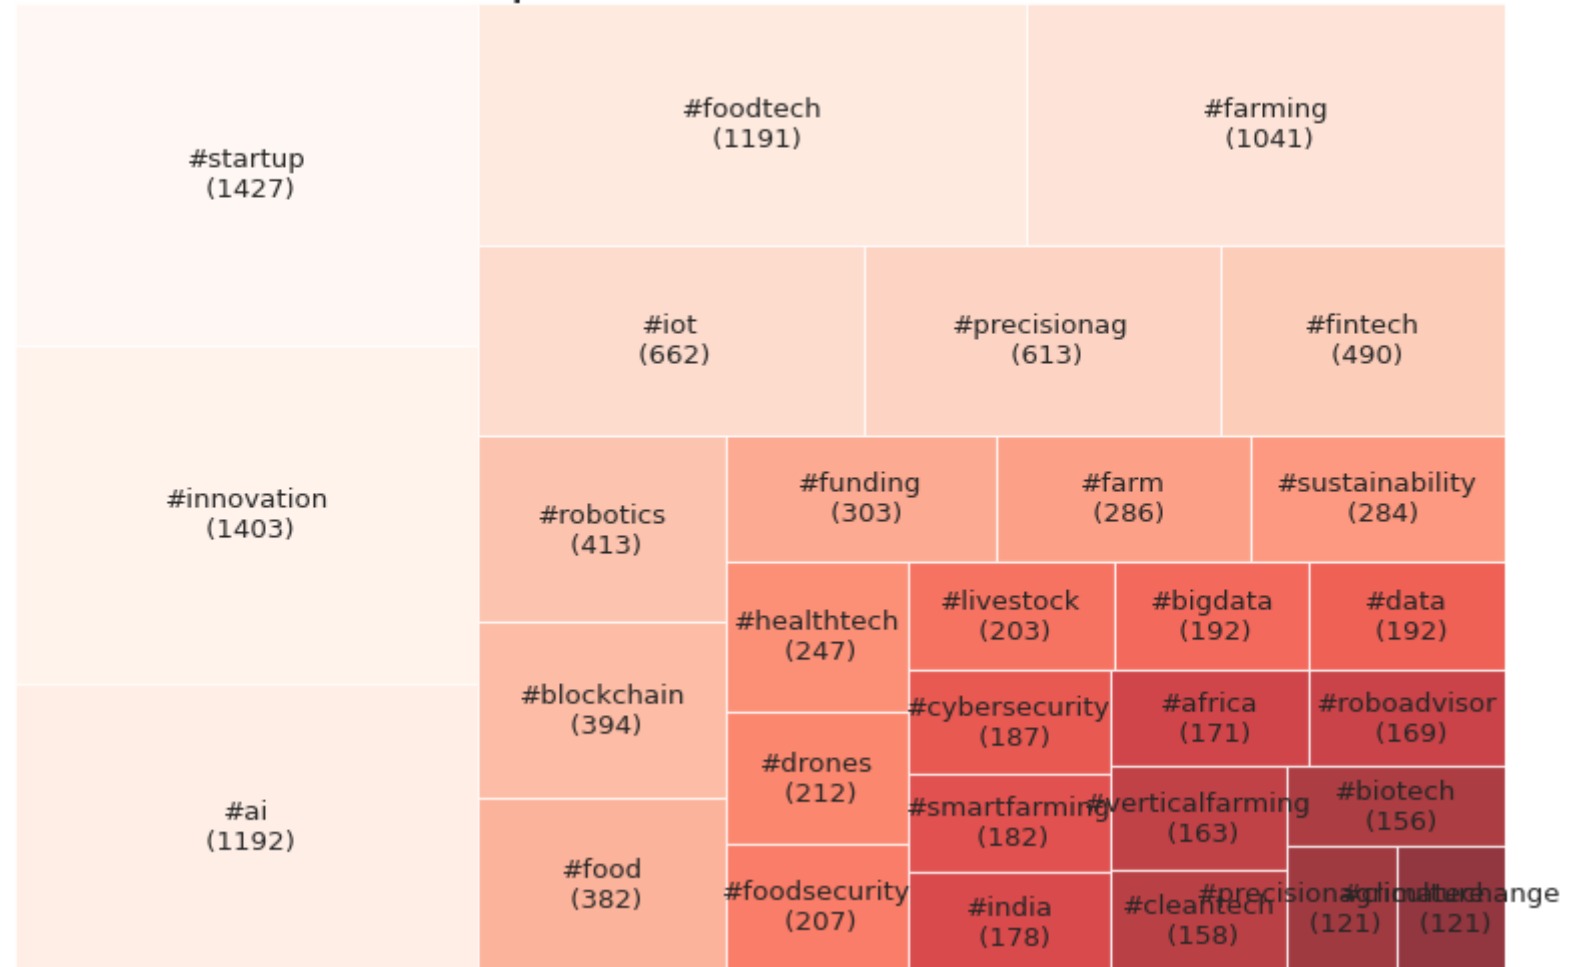

## A $\mu$ report

Machine Generated Insights

## What is being discussed?

- Start-ups, innovations & funding driving conversations
- Technologies top of mind... AI, IoT Blockchain. Robotics, Drones, Vertical farming, PrecisionAg etc
- Intersection with fintech, healthtech, biotech, cleantech etc
- India & Africa key regions explicitly discussed
- Security... both of food and data conversed

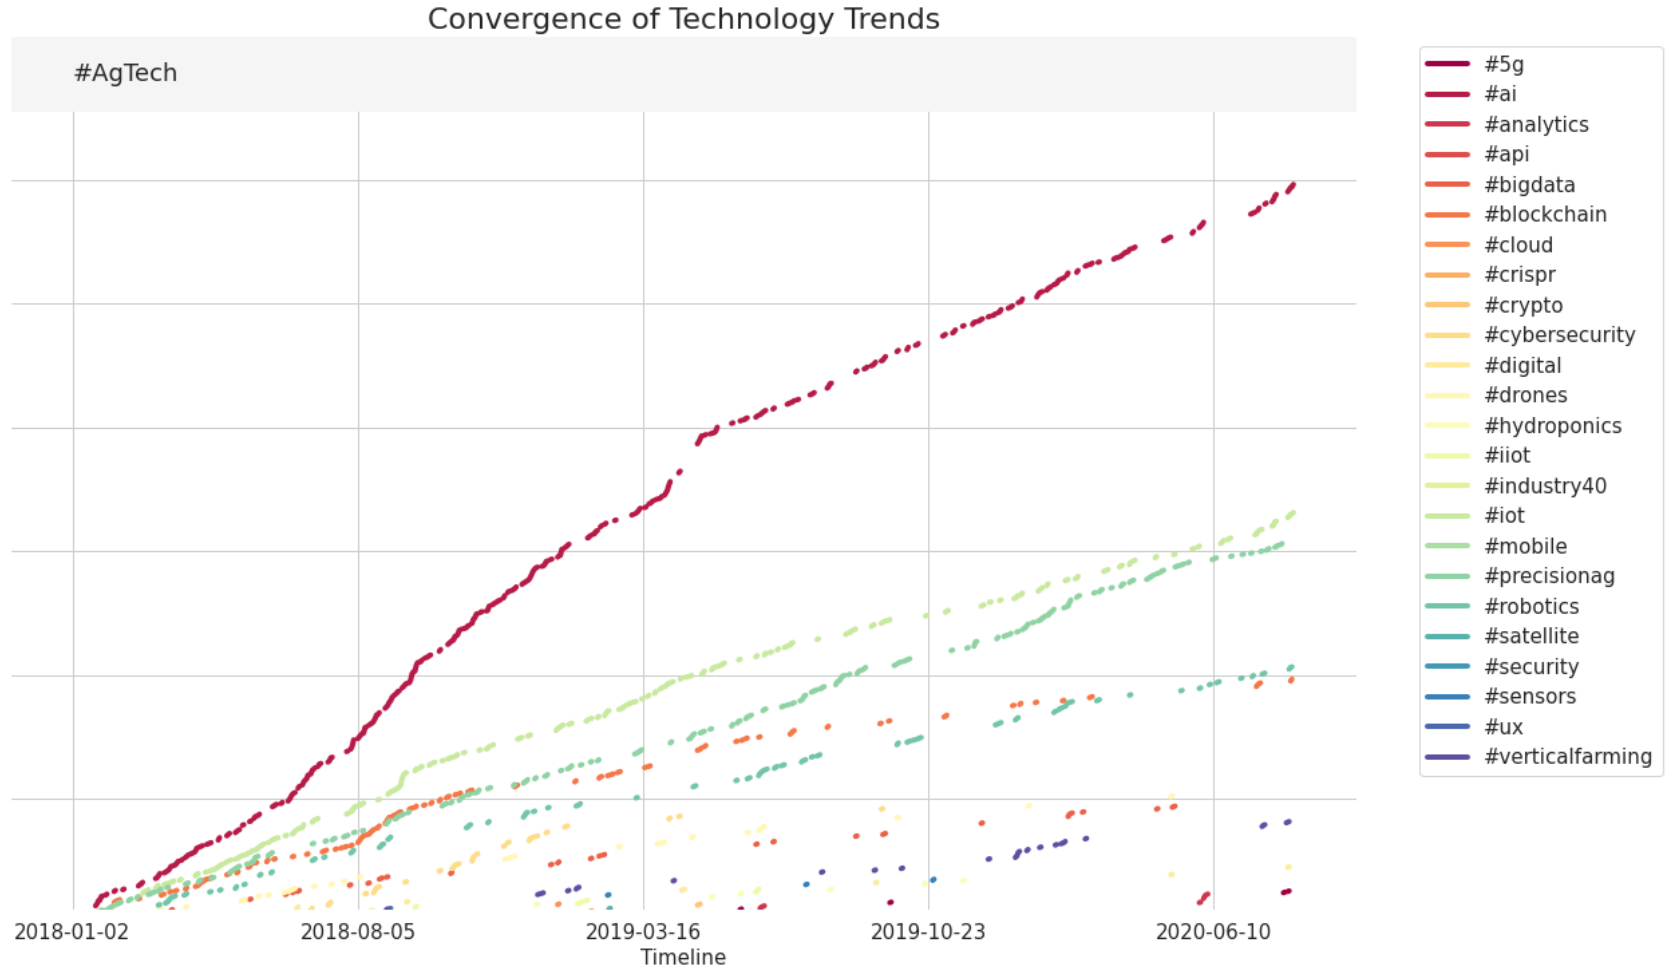

## Topics of conversation

## What Technologies are driving?

- AI the main focus
- IoT & Precision Agriculture has gained traction
- Robotics & Drones finding momentum
- Blockchain strong start but stuttering
- Rest trending in short bursts... 5G, hydroponics, vertical farming etc

## What are some use cases?

### Robotics

"Teach Giant #Robots to Grow Our Food"

"This autonomous robot from Japanese #agritech start-up Inaho selectively harvests ripe vegetables"

"This #robot uses #AI to harvest bell peppers and save humans from backbreaking #work"

"The supermarket will use autonomous farming robots to analyse, plant and protect crops from weeds at a farm near Stockbridge, Hampshire."

### IoT

"Connected farmers will rely on #drones and soil sensors, boosted by #5G connectivity for precision agriculture"

"From crop sensors to 'smart' tagging of livestock, #agtech continues to innovate and help farmers"

"Bring on internet of things and silo/grain monitoring from your cell phone"

"New forms of technology like virtual fencing are coming to the ranching sector in British Columbia"

"From operations & weather monitoring to pest management & food spoilage prevention, #IoT solutions are revolutionizing #farming"

### AI

"self-driving tractors, #AI, and #precisionagriculture will save us from the impending food crisis"

"An #autonomous #robot help farmers pick veggies from greenhouses"

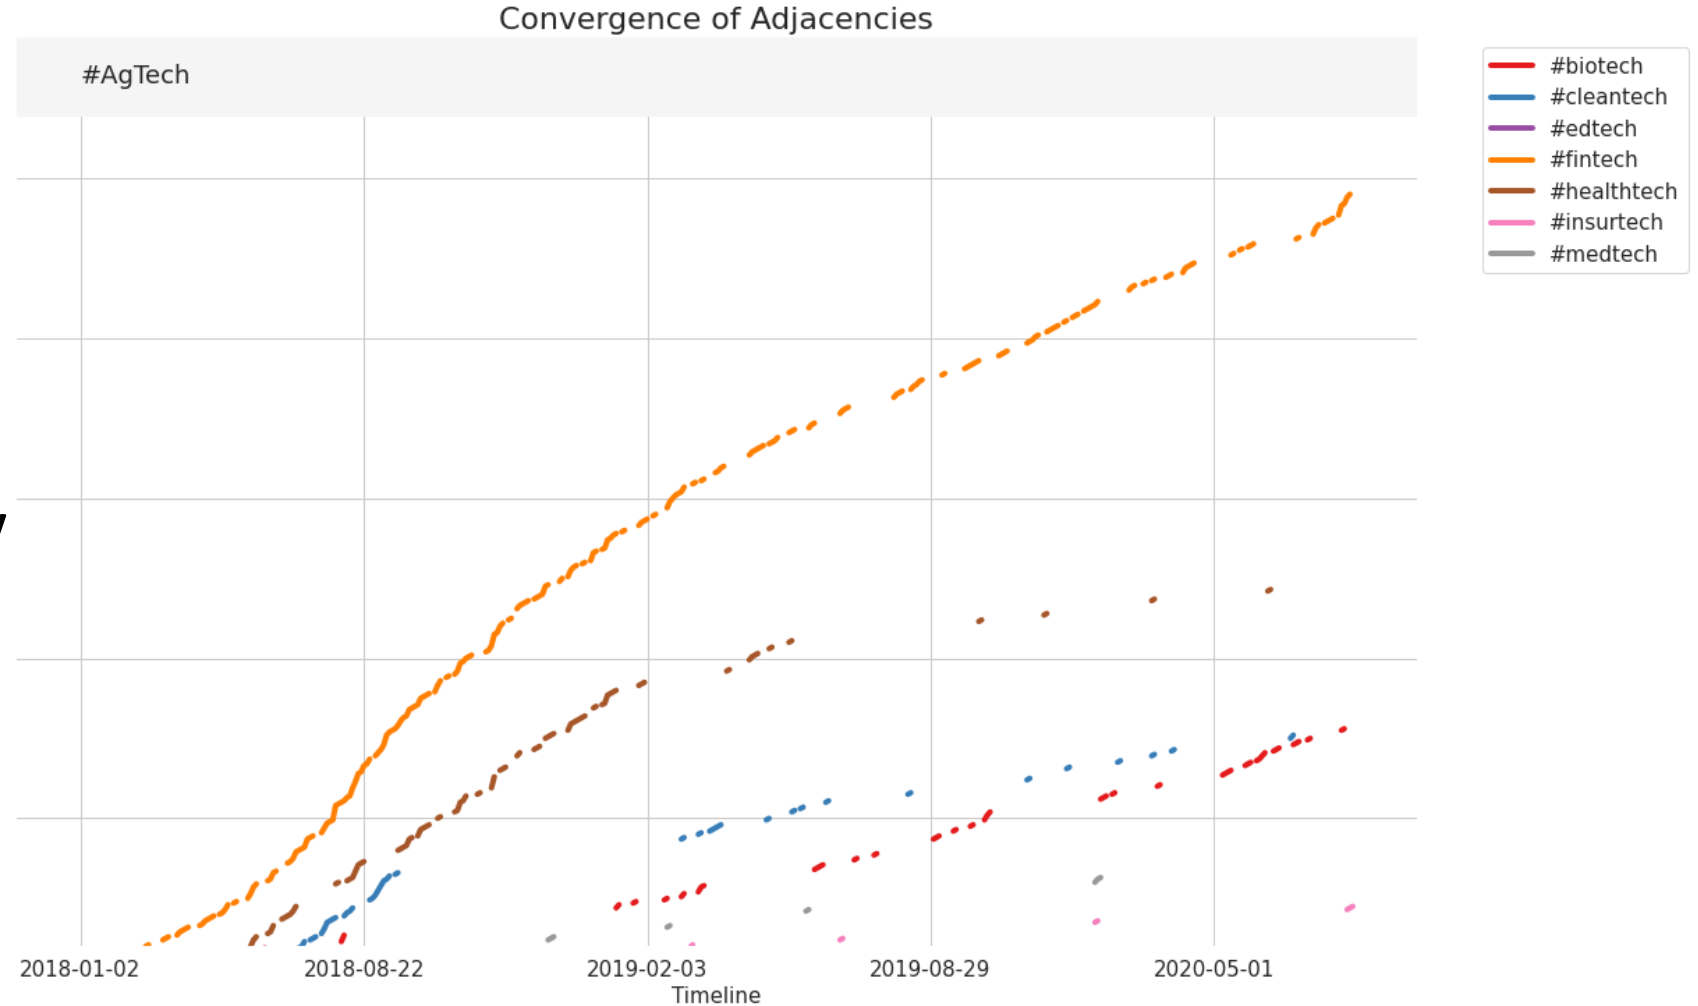

"Taranis uses #AI to analyze images taken from low-flying light aircrafts & drones to detect crop pest infestation & disease"

"How to produce optimum results from a grape harvest?"

"Intello Labs, an #agritech startup that uses #AI to enable quality control of agricultural products"

## What Adjacencies are intersecting?

- Fintech dominates via financing solutions etc
- Health & Medtech increasingly converging
- Cleantech conversations increasing around climate change, circular economy & sustainability
- Biotech key influencer while others trend in spurts

## What does the machine suggest next?

- Follow specific “ag economy” & “ag law” conversations
- Understand specific companies building livestock marketplaces (livestock247), IoT sensors (glasdata), farming equipment (johndeere), irrigation, drone based seeding, farm crowding
- Follow specific advances like in biochar, insight engines (truterra) & digital
- Understand work done in accelerators like AgriTechCatalyst and geographies of Nigeria, Australia
- Increase focus on intersection with cleantech and healthtech

Note: Only few suggestions displayed
